Aluminum Bar

6463-T6 Grade Aluminum

Rectangular Aluminum Bar - 12' Long

Item Code	Dimensions in Inches (A x B)
10-120-148	1/4 x 2
10-120-149	1/4 x 2-1/2
10-120-150	1/4 x 3
10-120-151	1/4 x 3-1/2
10-120-152	1/4 x 4
10-120-153	1/4 x 4-1/2
10-120-154	1/4 x 5
10-120-155	1/4 x 5-1/2
10-120-156	1/4 x 6
10-120-157	3/8 x 3
10-120-158	3/8 x 4
10-120-159	3/8 x 5
10-120-160	3/8 x 6

6463-T6 Aluminum

6463-T6 aluminum is a high-strength, heat-treatable alloy that combines excellent corrosion resistance with superior surface finish. Designed for applications requiring both structural performance and aesthetic quality, 6463 is commonly used in architectural and decorative extrusions where a premium finish and precise dimensional control are critical. The T6 temper provides maximum strength through solution heat treatment and artificial aging.

Key Features:

- High strength-to-weight ratio
- Excellent corrosion resistance, especially in marine and outdoor environments
- Superior anodizing and surface finish quality
- Good formability for complex extrusions
- Lightweight yet durable
- Ideal for visible and architectural applications
-

Typical Applications:

- Architectural and decorative extrusions
- Window and door frames
- Railings, handrails, and guardrails
- Lighting fixtures and components
- Marine and outdoor structural elements

Need Custom Cut Lengths?

We can cut your extrusions to your exact specifications. Simply request custom lengths when submitting your quote.

Don't see exactly what you're looking for? Let us know! We're happy to help source custom sizes, finishes, or specialty items to meet your project needs.
